Dear Parent and/or Future Student:

Please complete the Student Health Information Form (front and back) and return it to the Health Services Office along with a copy of your most current immunization record and insurance card prior to your arrival on campus. It is an Iowa Central Community College requirement that all students living on campus have an immunization record on file that is current and up to date.

Immunization requirements for enrollment are as follows:

- Two documented doses of the Measles, Mumps, and Rubella (MMR) or equivalent for all students born on or after January 1, 1957. The first dose must be given on or after your 1st birthday and the second dose must be given in 1980 or later and at least 30 days after the first dose.
- Tuberculosis (TB) testing is required for all Non-U.S. Citizens after arriving in the United States and/or anyone who has traveled outside the United States within the last 12 months.
- Meningococcal Vaccine is strongly recommended for all students living on campus. Attached is a vaccine information statement for the Meningococcal Disease and Vaccine for you to review and keep. If you choose not to be vaccinated at this time, after reviewing the information provided, you must check box #2 on the back of the Student Health Information Form under Meningitis and sign and date that area of the form.

It is strongly recommended that all students be current with their immunizations. Recommendations can be found on the Student Health Information Form.

If you are unsure of whether your immunizations are up to date, contact your health care provider or your local public department. If you have any questions about the immunization requirements, please contact Health Services at 515-574-1047.

Thank you
