

Iowa Community College Test Center Reciprocity Agreement

Rationale

Distance Learning community college students often struggle to find convenient, affordable testing centers for remote testing. This reciprocity agreement would improve student access to affordable, secure testing services across Iowa.

Shared Testing Services

The Iowa Community College Distance Learning Dean's/Director's group proposes a college test center reciprocity agreement among the test centers at all locations of Iowa's 15 Community Colleges. If enacted this reciprocity agreement would waive testing fees for community college students taking college credit course assessments at any Iowa Community College testing center.

Process

The student's home institution will be responsible for communicating exam information to the guest-testing center. The proposal is only for credit courses and would not include outside, third-party vendor testing. Proof of ID would be required from the student.
