

Diesel Technology Tool List

The following is the list of tools required for enrollment in Diesel Technology program. It is almost universally understood that an employed mechanic furnishes his/her own hand tools. Since the objective of our program is to train students for employment as mechanics, these tools will allow the student to start his/her personal tool kit, adding to it as he/she wishes. We highly recommend that quality be purchased. Many students will have some of these tools already. If so, it would not be necessary to purchase new ones. The items **highlighted** are items that must be purchased for the first day of class.

Approximate cost for tools is \$3,000.00 for the entire program.
Approximate cost for Toolbox is \$1,000.00-\$3,000.

NOTE: TOOLS MUST BE OF A MECHANICS QUALITY.
